

MGR Reel Transition Pack Vol.1

Installation Guide — DaVinci Resolve 18+

INSTALLATION STEPS

1

Download the File

After purchase, download `MGR_Reel_Transition_Pack_Vol_1.drfx` from your Gumroad library.

2

Double-Click to Install

Locate the downloaded `.drfx` file and double-click it. DaVinci Resolve will automatically install the transition pack — no manual folder navigation needed.

3

Open DaVinci Resolve

Launch DaVinci Resolve 18 or above. Open any existing project or create a new one.

4

Go to the Edit Page

Click the `Edit` page tab at the bottom of the screen (scissors icon).

5

Open the Transitions Panel

In the top-left panel, click `Effects Library` → `Toolbox` → `Video Transitions`.
Scroll down to find the `MGR` folder.

6

Drag & Drop

Drag any transition from the `MGR Push Transition` or `MGR Rotate Transition` folder and drop it between two clips on your timeline. Done!

WHAT'S INCLUDED — 13 TRANSITIONS
